Subject: ID: Business Rules for Validation on TN vs. Address-Release
10.2

Attention CLECs,

Attached are the business rules for validating the end user address by telephone number for UNE-P Bus/Res Non-Complex (REQTYP M) that was implemented with Release 10.2 (TAG 7.6.3) on 11-3-01. This feature is associated with CR0133 (Migration of UNE-P Notifications) and CR0371 (Validation on TN vs Address).

The attached information will be incorporated into the BBR-LO Issue 9S scheduled for posting to the Interconnection Web site on 12-5-01. A Carrier Notification Letter is forthcoming.

We apologize for the delay in providing you with this information. Since this feature was added to Release 10.2 based on the GA PSC recommendation with a date of 11-3-01, we were not able to follow our normal intervals for providing documentation.

At our 10/25/01 User Requirements meeting, BellSouth committed to verify when AN, ATN, EATN and EAN would be used with REQTYP M. The BellSouth response to this item is as follows:

AN and EAN are valid for some UNE P Products. Example: Channelized 4 wire DS1 Loop with Port. This item is manual only and is in a separate section of the BBR-LO. The REQTYP M RES/BUS section of the BBR-LO will be updated to remove the AN field.

EATN is normally used for migrations. EATN is the existing account and ATN is the migrating to number.

Please let us know if you have questions.

Thanks,

Change Management Team
